

Elacin Universal Swim

Especially for:

- Water enthusiasts
- People who are susceptible to ear infections

Elacin Universal Swim earplugs were designed for people who are susceptible to ear infections after swimming or simply don't like water in their ears. These swimming earplugs float and are comfortable to wear thanks to their unique fit. Elacin Universal Swim is a one-size-fits-all earplug.

The design is unique and innovative. It has two lamellae and its curved shape is uniquely matched to the average of a large population of ear canals, ensuring a comfortable fit in most ears. The lamellae are very soft to optimize the seal with minimal pressure. The handgrip is shaped such that one intuitively holds and inserts the product correctly without any instruction.

Material

The Elacin Universal earplug is manufactured out of very soft cytotoxicity-free thermoplastic elastomer (40 Shore).

Filter

The Elacin Universal Swim has no filter inside.

Colour

The Elacin Universal Swim is delivered in blue.
