

Communicating with radio traffic while wearing hearing protection

This is the Elacin RC SoloCom

Listen to your colleagues talking on the walkie-talkie while wearing your hearing protection. The Elacin RC SoloCom works as two-way radio earphones and hearing protection in one. The advantages? Optimal protection, safe communication and a comfortable fit. In this way, everyone on the work floor receives the correct instructions and everyone communicates on the same line.

Connect the Elacin RC SoloCom to your walkie-talkie, place the hearing protection in your ear and hear everything your colleagues say.

Importance of hearing protection

Sound is constantly present. Often hard, rarely soft. Hearing protection is therefore desperately needed in the professional market. But one forgets this when communicating. When the walkie-talkie turns on, the earplugs turn off. This can lead to hearing problems such as ringing in the ears and tinnitus.

Next level communication

With the Elacin RC SoloCom, you can protect your hearing, listen to the walkie-talkie and hear your colleagues even better. No noise. No hollow sound. Excellent call quality. That is the power of the Elacin RC SoloCom. The fine, ergonomic fit makes you almost forget you're wearing Elacin.

What do you need to pair your earplugs with a radio system?

- + Elacin RC earplugs
- + Elacin RC Tube
- + A normal or ATEX radio with accompanying listening cable

Communicating to radio traffic with hearing protection in: that's how it works

If you want to listen to the radio traffic, click the SoloCom into the Elacin earplugs. Then connect the SoloCom to the walkie-talkie with the supplied cable. In this way, all communication through the earplugs reaches the employees.

Those who talk via radio traffic wear an Elacin RC SoloCom with the speech unit. This is a microphone that you attach to your collar. Press the button to contact the radio network.

What do you need to communicate with hearing protection?

- + Elacin RC earplugs
- + Elacin RC SoloCom
- + A cable that connects to your radio (included)
- + Your own two-way radios PTT
- + Optional: Elacin PTT/Speech unit

Who is Elacin RC SoloCom designed for?

For anyone who works in noisy environments. Think of industrial environments, wood processing companies and construction sites. The Elacin RC SoloCom is also suitable for teams in which not everyone has to talk, but mainly has to listen. Such as emergency services, security services and operators.
