

## Calling while wearing hearing protection

### This is the Elacin RC BoomMic

Refuse to choose between hearing protection and calling. With the Elacin RC BoomMic you can do both at the same time. This unique headset is the connection between your (desk) telephone and the Elacin RC earplugs. Walk around the construction site with your earplugs in, while you call your colleagues who are on the fourth floor. You understand each other perfectly.

Make a phone call next to a noisy machine with the Elacin RC BoomMic and your colleague will hear only your voice loud and clear, not the background noise.

#### Importance of hearing protection

A quick call with a customer. Talk to your colleagues via a radio. These are typical moments when earplugs are removed. But did you know that spending five minutes a day in noisy environments increases the risk of hearing damage?

#### Hear the world as it is

With the Elacin RC BoomMic you communicate while wearing your hearing protection. The noise-cancelling microphone filters the noise around you such that the person on the other end of the line perfectly understands you. You can communicate pleasantly, without taking out your earplugs. Thanks to the ergonomic fit, you'll forget you're wearing the Elacin RC BoomMic.

#### Calling while wearing hearing protection: this is how it works

When you want to make a call, click the RC BoomMic into the Elacin earplugs. Connect the RC BoomMic to your (desk) telephone directly or portable radio with the supplied cable and off you go.

#### What do you need to call with hearing protection?

- + Elacin RC earplugs
- + Elacin RC BoomMic
- + A cable that connects to your telephone or portable radio (included)
- + Your own telephone or portable radio

#### Who is Elacin RC BoomMic designed for?

For anyone who wants to communicate normally while wearing hearing protection. Soldiers who always want to understand their colleagues. Emergency services and security guards who must stay in touch with each other. Call centre employees who want to call their customers in peace. The list is endless. For all of them, Elacin RC BoomMic is the ultimate solution.

No telephone, but a portable radio? The same ease, comfort and quality can be found in the Elacin RC BoomMic PTT. This variant is suitable for every brand.

#### The power of the Elacin RC BoomMic
