

Drive | Elacin RC mini grip

The loud roar of an engine. The euphoria of passing through the landscape at speed or the simple pleasure of going for a ride together. Anyone with a passion for motorbikes chooses Elacin Drive hearing protectors. Irritating wind noise is reduced to a minimum so you can enjoy the roar of powerful engines to the full. Elacin Drive hearing protectors also ensure that you can hear with clarity, for example your navigation system.

Intended users

Elacin Drive hearing protectors are intended for motorcyclists, drivers of convertibles, go-carting enthusiasts and visitors to motorcycle, car and other large events.

Comfort

The new RC generation is also custom-made from medically classified soft silicone material and provided with an O-ring for comfort underneath a helmet or earmuffs offering the user optimum wearing comfort.

Optimal speech intelligibility

The new Elacin RC ensures even flatter attenuation. This guarantees optimal speech intelligibility and makes the RC the recommended hearing protector for work in (industrial) environments with a wide variety of noise levels. With this latest generation of hearing protection, Elacin offers users enhanced and continuous safety in the work place.

Material + Colour

Drive Elacin RC hearing protectors are made from silicone (60 shore) material and supplied in black and with a cord by default.

Especially for:

- + Motorcyclists / motor sport
- + Drivers of convertibles
- + Go-cart drivers
- + Delta/Ultralight pilots
- + Visitors to car and motor sport events

Suitable for use in

- + Where speech intelligibility, work sound and warning signal perception are important
- + Environments with harmful noise levels – even the high ones

Benefits

- | | |
|--|--|
| <ul style="list-style-type: none"> + Very high speech intelligibility and perception of warning signals + Custom-made for a perfect fit + Acoustical and physical wearing comfort | <ul style="list-style-type: none"> + No protruding parts — fits completely into the auditory canal + Optimal protection + Made from soft, light material + Easy to insert and remove |
