

## Music | Elacin RC

Music can be exhilarating or uplifting, creating a melancholic or joyful mood. To experience the true power of music, choose Elacin Music hearing protectors. The revolutionary filters ensure even attenuation that won't distort the sound of your favourite piece. And you don't need to remove the hearing protectors from your ears to understand speech from your surroundings.

### Intended users

Elacin Music hearing protectors are intended for sound crews and staff as well as visitors to clubs and pubs.

### Comfort

The new RC generation is also custom-made from medically classified soft silicone material.

### Optimal speech intelligibility

The new Elacin RC ensures even flatter attenuation. This guarantees optimal speech intelligibility and makes the RC the recommended hearing protector for work in (industrial) environments with a wide variety of noise levels. With this latest generation of hearing protection, Elacin offers users enhanced and continuous safety in noisy environments.

### Material + colour

Music Elacin RC hearing protectors are made from silicone (60 shore) material and supplied in transparent and with a cord by default.

### Especially for:

- + Music enthusiasts
- + Staff and visitors of
  - + clubs and pubs
  - + rock concerts and dance events

### Suitable for use in

- + Where speech intelligibility, work sound and warning signal perception are important
